PROPOSED LEAKING UST (LUST) CASE CLOSURE

The Arizona Department of Environmental Quality (ADEQ) is considering closure of the following leaking underground storage tank (LUST) cases:

LUST File No. 1277.04
Facility ID No. 0-002454
Apache County

(2) 275 Gallon Used Oil/Kerosene USTs
TNT Bulk Plant
124 West Main Street
Springerville, AZ 85938

The Arizona Revised Statutes § 49-1005(E) and Arizona Administrative Code [A.A.C.] R18-12-263.04 allow case closure of LUST sites with groundwater contamination above the Arizona Aquifer Water Quality Standards (AWQS) after eligibility requirements are met. For the above-referenced LUST site, ADEQ has considered the following criteria:

1. The UST release has been adequately investigated.
2. The source of contamination that affected groundwater quality has been removed.
3. The soil meets the applicable soil remediation levels.
4. There are no drinking water wells that are threatened or impacted by the UST release.
5. The groundwater plume is not expanding.
6. The groundwater contamination is naturally attenuating.
7. The requirements of Arizona Revised Statutes § 49-1005(D) and (E) have been met.

The plume of release-related compounds was reduced by Excavation and Natural Attenuation until only monitor well MW-1 had benzene concentrations exceeding the AWQS.

Monitor Well	Compound exceeding the AWQS	Highest Concentration (ug/L)	Date	Current Concentration (ug/L)	Date	AWQS (ug/L)
MW-1	Benzene	26	10/10/07	11	03/12/08	5

ug/L = micrograms per liter

Site-specific information concerning this closure is available for review during normal business hours at the ADEQ Records and Library Review Area, 1110 W.
